

Rectangular Stickers

supplying guide for rectangular stickers

Rectangular Stickers Checklist

- ✓ Artwork is 300dpi
- ✓ CMYK Colour profile
- ✓ All fonts embedded
- ✓ Keep text to at least 6pt to ensure legibility.

Be aware of how large or small your sticker will be when printed. Large areas of text aren't recommended for small stickers.

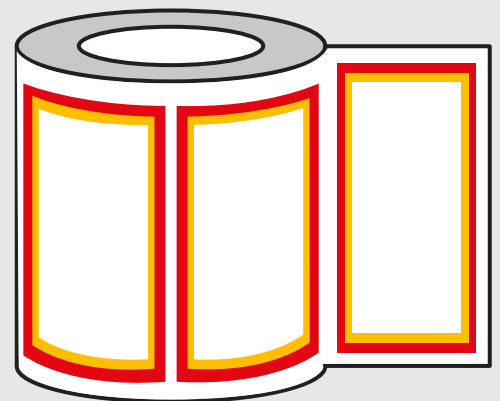

Bleed (3mm)

The bleed area extends 3mm beyond the edge of your finished document. Colours and images must extend beyond the edge of the document to prevent unwanted white borders around the edge of your finished document. Note that this 'bleed' will be trimmed during the finishing process so ensure that no important details are set up to print in this area.

Safe Area (3mm)

It is recommended that your artwork is at least 3mm from the edge of the page if it is not meant to bleed off. Printed borders placed too close to the edge of a page may look uneven when the job is trimmed.

We will supply your rectangular stickers on a roll.
